

# U.S.-Japan Trade Agreement

## Wine

**Overview:** In 2024, the United States exported \$79 million of wine products to Japan, making Japan the #4 overseas market for U.S. wine. U.S. exports accounted for seven percent of Japan’s total wine imports. The years below correspond to Japan’s fiscal year beginning April 1.

**Market Considerations:** Wine consumption in Japan has risen steadily over the last decade. Total imports were valued close to \$1.8 billion in 2023. The United States was the fourth largest wine supplier on a per value basis, competing with major wine suppliers such as EU members (e.g., France, Italy, and Spain), Chile, and Australia which enjoy preferential tariff access. Under the U.S.-Japan Trade Agreement, the United States gained tariff advantage over Argentina and South Africa. Upon full implementation of the U.S.-Japan Trade Agreement, the United States will gain tariff parity with suppliers from the EU, Chile, and Australia. Most Japanese retail stores shelve a variety of wines at different pricing levels. Some terms such as “Champagne” and “Bordeaux” are restricted for use as geographical indications in Japan (see [JA8003](#)). Beginning October 1, 2026, Japan will enforce organic alcohol regulation, which will require organic products to be certified and carry JAS organic logo on products.
