Safeguard: Beginning April 1, 2025, the seasonal U.S.-specific safeguard for oranges is eliminated.

Market Considerations: Japan imports one-third of its fresh fruit, with the United States ranked as the third largest supplier (leading supplier of fresh oranges, lemons, grapes and cherries). The Japanese fresh fruit sector is highly competitive. Phytosanitary certificates must accompany all fresh fruit imports to Japan. Some fresh fruit varieties do not currently have market access to Japan due to phytosanitary requirements.
